The image shows a KiCad schematic editor window with a project schematic for a WeMos32 ProtoShield. The schematic is drawn on a grid with a blue border. The grid is labeled with numbers 1 through 8 horizontally and A through E vertically. The schematic includes two 10-pin headers, J3 and J1, connected to a 3.3V and 5V power source. The 16-pin header JP2 and JP1 are connected to a 3.3V power source. The project name is 'WeMos32 ProtoShield' and the sheet number is 1 of 1.

The image shows a KiCad schematic editor window with a project schematic for a "WeMos32 ProtoShield". The schematic is drawn on a grid with a "Prototyping Area" label. It features two 10-pin headers (J3 and J1) and two 16-pin headers (JP2 and JP1). The connections are as follows:

- J3 (10 pins):** 1: SVP, 2: GPIO25, 3: GPIO26, 4: SD1, 5: CMD, 6: SDO, 7: CLK, 8: 3.3V, 9: GND, 10: 5V.
- J1 (10 pins):** 1: SVP, 2: GPIO25, 3: GPIO26, 4: SD1, 5: CMD, 6: SDO, 7: CLK, 8: 3.3V, 9: GND, 10: 5V.
- JP2 (16 pins):** 1: SVN, 2: GPIO16, 3: GPIO5, 4: GPIO4, 5: GPIO0, 6: GPIO2, 7: GPIO14, 8: GPIO12, 9: GPIO13, 10: GPIO15, 11: RX, 12: TX, 13: 3.3V, 14: GND, 15: GND, 16: N\$118.
- JP1 (16 pins):** 1: SVN, 2: GPIO16, 3: GPIO5, 4: GPIO4, 5: GPIO0, 6: GPIO2, 7: GPIO14, 8: GPIO12, 9: GPIO13, 10: GPIO15, 11: RX, 12: TX, 13: 3.3V, 14: GND, 15: GND, 16: N\$118.

The schematic also includes a "GND" symbol and a "3.3V" label. The project name is "WeMos32 ProtoShield" and the sheet number is 7. The title bar shows "WeMos32 ProtoShield" and the file name is "working.kicad_sch".
