

Connections to Amplifier

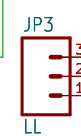

Intentionally not-connected to create telescoping shield.

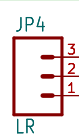

Upper Left

Upper Right

Lower Left

Lower Right

Common Bathroom Scale
3-Wire Load Sensors

4 load sensors combine to create one load cell

Wire colors will vary greatly-
Use a multimeter to measure the resistance
between the three wires. Find the two wires
with the larger resistance between them.
This is + and -. The wire with lower
resistance is center.
Sometimes red is center, sometimes
white is center.
